

How do I *know* I'm making the best replacement window decision?

How can I tell which windows are energy efficient?

Consider the KEY PERFORMANCE FACTORS

1

What is the best performing window material?

Compare FIBERGLASS to other materials

2

Do all windows basically look and function the same?

Learn about EASE OF OPERATION CLEANING AND DESIGN DETAILS

3

How do I know which company is reliable?

Look at their REPUTATION, EXPERTISE and WARRANTY

4

How do I know I'm getting a good value?

Look for the BEST WINDOW for the BEST PRICE

5

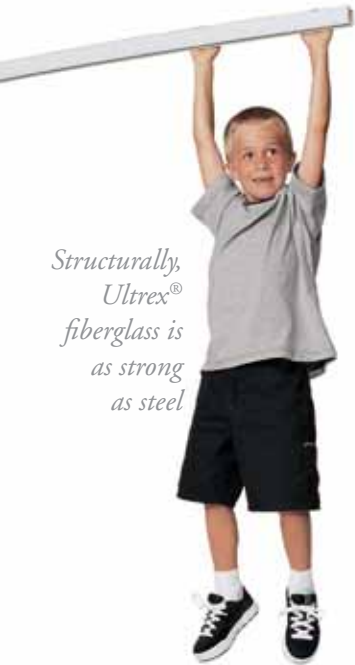

Answers are good. Proof is better.
The 5 Point Proof exclusively from Infinity.

We are happy to answer your replacement window questions, but we want to go one step better. We'll show you the proof behind those answers; the reasons why *Infinity® from Marvin* is your best choice in replacement windows. Our windows meet and exceed the most stringent performance standards, but we know they must still meet an even higher standard: yours.

INFINITY[®]
from **MARVIN**
REPLACEMENT WINDOWS

The *proof* is in your hands.

Structurally,
Ultrax®
fiberglass is
as strong
as steel

1 TOTAL PERFORMANCE Home comfort — no leakage, no drafts, top thermal performance

- Design Pressure (DP) 30 means *Infinity*® windows will handle the pressure of 132 MPH winds and are watertight when exposed to 8" of rain per hour driven by 42 MPH winds
- *Infinity* windows meet ENERGY STAR guidelines and have a low .30 U-Value, which measures the amount of heat transfer through the window (lower is better)
- *Infinity* windows with optional LoE³-366 glass qualify for up to \$1500 in Federal Energy Tax Credit in 2009 and 2010!

2 SUPERIOR MATERIALS Low maintenance, durable, will look good over time

- *Infinity* windows are made entirely of Ultrax®, a durable, pultruded fiberglass material
- Ultrax fiberglass is 8x stronger than vinyl and 3.5x stronger than wood/vinyl composites
- Ultrax fiberglass has a very low thermal expansion rate (similar to glass), which keeps the window stable and weathertight. Vinyl expands at over 7x that rate.
- Ultrax fiberglass is virtually maintenance-free and won't rot, warp, or dent
- Made with partially recycled materials, Ultrax fiberglass is environmentally friendly and requires 39% less energy to produce than vinyl

3 APPEARANCE AND DESIGN Attractive, easy to operate, easy to wash

- A narrower window profile gives you more daylight and better views
- *Infinity* windows are extremely easy to operate and clean from the interior of your home
- Designed to replicate the details and beauty of traditional wood windows
- Available with an EverWood® interior which looks, feels, paints, and stains like wood yet is inorganic and completely low maintenance
- *Infinity* windows can be painted, if desired

4 RELIABILITY AND EXPERTISE Peace of mind, no-hassle experience

- Installing retailers are hand-selected for their experience and commitment to customer satisfaction, making your project simple *and* hassle free
- *Infinity* products are backed by Marvin Windows and Doors, an industry leader since the 1930s
- *Infinity* products feature a Limited Lifetime Warranty

5 TOTAL VALUE Satisfaction of the best windows for the best price

- *Infinity from Marvin* offers superior performance, materials, appearance, design, reliability and expertise
- All these features at a competitive price
